INSTALLATION MANUAL

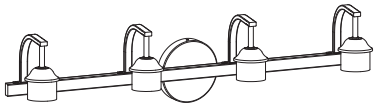

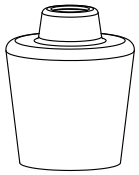

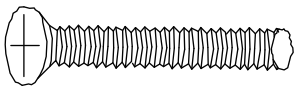

4-LIGHT BATHROOM VANITY LIGHT

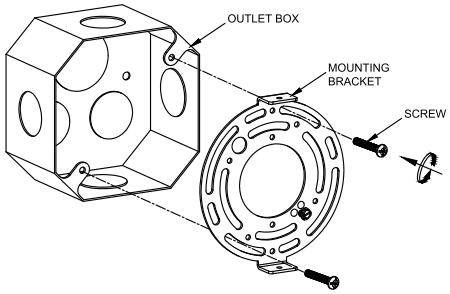

WARNING - RISK OF ELECTRIC SHOCK

Turn off power at the circuit breaker before installation. Verify that power is off. Installation should be performed by a qualified electrician.

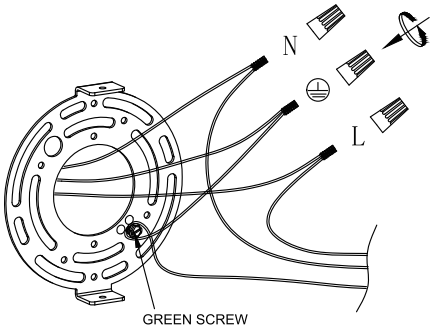

Parts list:

	
Fixture body x 1	Glass shades x 4
	
Wire connectors x 3	Mounting screws x 2

1. Install the mounting bracket

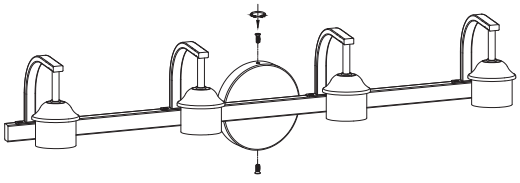

Attach the mounting bracket to the junction box using the mounting screws. Make sure the bracket is secure.

2. Connect the wiring

With power off, have a qualified electrician connect and ground the fixture as shown. Secure the wire connections with the supplied connectors.

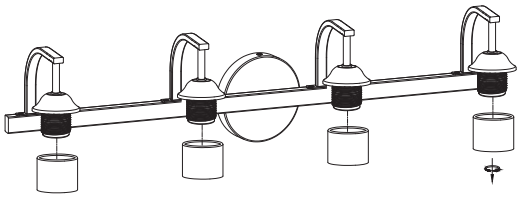

N - Neutral wire
L - Hot (live) wire
⏚ - Ground wire

3. Secure the fixture

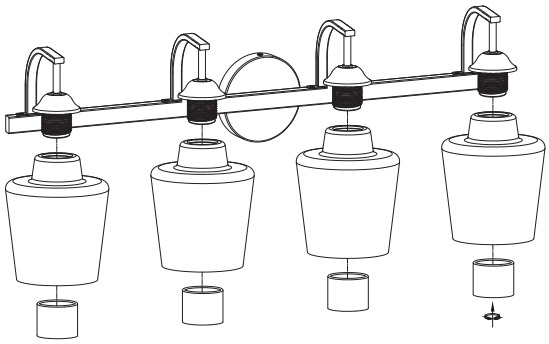

Position the fixture backplate over the mounting bracket. Secure it with the retaining screws shown in the diagram.

4. Remove the retaining rings

Unscrew and remove the socket retaining ring from each lamp holder.

5. Attach the glass shades

Place a glass shade over each socket, then reinstall the retaining ring to hold it in place. Tighten gently by hand. Do not overtighten.

6. Install the bulbs

Screw an E26 bulb into each socket. Do not exceed 60W actual wattage per socket. After assembly is complete, restore power and test the fixture.

Bulbs and dimming. Bulbs and dimmer are not included. Dimming requires dimmable bulbs and a compatible dimmer.

Before maintenance. Turn off power and allow the bulbs to cool before cleaning or replacing them.

Cleaning. Use a clean, soft, dry cloth. Avoid harsh chemicals, abrasive cleaners and direct water exposure.

Installation. Keep the work area dry and protect the fixture, glass and wiring from damage during installation.
